

XM Radio provides services to my family that other broadcast stations can not, or do not provide. I can control the message I want, when I want with XM. Broadcast radio serves me only on local issues, and I elect to listen to them when I want to. The FCC or the federal government has no right to remove the RIGHTS that I now have. The services that XM Radio provide outstrip the failures of broadcast radio. This is a money issue to them. If they provide the services I want, I will listen. Send the lobbyist home, and tell them no.
